COURSEWORK

UNDERGRADUATE
Operating Systems
Database Management System
Data Structures and
Algorithms
Software Engineering
Computer Programming
Object Oriented Programming
Computer Graphics
Artificial Intelligence
Optimization Techniques

SELF STUDY
Web Development
FrameWorks

SKILLS

PROGRAMMING
JavaScript • C++ • Node.js
HTML • CSS • Python • Mongodb •
MySQL

OPERATING SYSTEM
Ubuntu • MAC • Windows

VERSION CONTROL
git • Github

TRAINING

SELF-LEARNED   Web Development Bootcamp
July 2019 - Dec 2019
- Front-End Development.
- Framework •Node.js •React.js
- Server-side Scripting using JavaScript
- Bootstrap Styling

PROJECTS

MOVIE WATCHLIST
04/2020 – 06/2020
- **Framework:** Node.js
- **Languages:** JavaScript, HTML, CSS, Express.js, Jquery, APIs
- **Database:** Mongodb along with Mongoose as npm package
- **Link:** Movie Watchlist

The Project provide an interface locally where user can search for the movies using OMDB user friendly API interface and can have all the nice and clean information related to that specific movie using requests made to the server.
At the same time user can maintain a interactive wishlist to add the desired movie in the database powered by Mongodb.

MAGICMIRROR ON RASPBERRI PI 3
03/2018 – 05/2018
- **System:** Raspberry Pi 3
- **Languages:** JavaScript, Python, CSS, Node.js, APIs.
- **Link:** MagicMirror

The MagicMirror provides the user with an enhanced mirror experience. By making use of multiple displays, the user can stay updated on the time, weather, and news headlines while preparing for the day. The mirror display is provided by a flat LED display monitor which displays all the necessary information which are useful for the user all powered by Raspberry pi 3 in the Back-end.
